The Clamor for Reform in Great Britain.
In considering the Reform Bill of 1832, we are forced to the conclusion that a peaceable or a violent change was inevitable; in choosing between the two, was there room for reasonable hesitation? The political machinery was out of order, and had the repairs of the "frame of Parliament" been longer delayed, very great hazard of its total dislocation would have been incurred. The task of renovating, no doubt, was a delicate one, and not unattended with risk; but the attempt was necessary, and it succeeded. As a matter of fact, that movement derived its strength from something much stronger than the lower class; it was not to insurrectionary violence that the Legislature yielded. The movement proceeded mainly from the "middle class." The middle class, before the Reform Bill, possessed little, if any, direct political power. After the Reform Bill, it enjoyed the largest share. The middle class, reinforced by the discontent which intense distress, at that time, had produced among the lower, presented a formidable combination, which any Government might well fear to encounter. The House of Lords actually yielded to the extraordinary pressure put on them by the King; but it is more than probable that had they been able to surmount his opposition, they must have given way to the middle class. They were fighting a battle in which almost every element of social power was ranged on the other side. Those who compare those times with these, and threaten the opponents of the Reform Bill with the rout that befel the antagonists of its greater prototype, forget the material fact that the middle classes were on the wrong side of the pale then, and that they are on the right side now. We read the threats of the Radical orators. In 1832, Mr. Bright told the people that a reduction of the franchise would soon be demanded in "rougher tones" than his; and in 1867, he declares that unless it is granted an "accident" would happen to British institutions such as drove Charles X. from his throne. Orators of less distinction than Mr. Bright, and the writers in his daily organs, follow in the same strain more boldly, and tell us a great deal about "the people rising in their might." We notice discussions upon questions of organic change that are carried on as if it were under the shadow of revolution. Issues between the legislature of the country and the lower classes in the great towns are quietly assumed by Radicals and believed by timid Conservatives to be mere questions of the patience of the latter. When once they are piqued by their enemies, or persuaded by their friends, to "rise," the ultimate tribunal of the nineteenth century has spoken. No one, says an able writer who has watched the recent tendency of political discussions, can have failed to observe how deeply this theory has tinged our political philosophy, and to a certain extent our political action. Yet it is a curious doctrine to have lifted itself so high, especially in England. No one can say that its history gives the slightest countenance to it. Its whole course is a chronicle of constant concessions to enlightened public opinion; but it does not record a single instance of concession to mob violence. The case most nearly in point, in recent times, is the agitation under which the Reform Bill of 1832 was carried, to which we alluded above. It is not, however, from any English experience that the popular notion of the invincibility of the lower classes, if aroused, has arisen. The political history of their neighbors across the channel has always produced a strong effect on the imagination of all classes in England; a stronger effect, perhaps, from the slight distance and the strangeness of the surrounding circumstances, than would have been produced by similar events if they had happened at home. The events of the last session show that no future Government can venture to present any such measure which shall involve a large transfer of power, or which shall be constructed under fear of the artisan or laboring classes, in order to satisfy the agitation their advocates have made. Let us now glance for a moment at the real position of the working classes who are said to be excluded from the franchise. The Pall Mall Gazette, of the 6th of March, 1866, informs us:

"That as soon as the Ministry had decided on the principle and outlines of their reforms, they began to collect information about it. As soon as they had fixed their franchise, they asked for returns to show how many and what sort of persons that franchise would admit. The result startled the

Ministers and surprised the public. It appeared, from the statistics furnished to them by the local authorities, that so far from there being scarcely any working men upon the register—so far from the laboring classes being 'seifs,' as Mr. Potter called them, or 'outside of the pale of the Constitution,' as Mr. Bright and Mr. Foster phrase it—from 20 to 22 per cent. of the electors now on the list belong to the working classes; and a further investigation has confirmed the main conclusion—viz., that one-fifth to one-fourth of the actual constituency of England consists of those very classes who were believed to be virtually excluded from the franchise, and whose admission was the object of the contemplated Reform Bill."

Such is the position of the working classes, shown by the official returns furnished by Mr. Gladstone himself. To say, then, that Parliament, or any party in it, is opposed to the admission of the working man to the polling-booth, is studiously to falsify the facts. When the working man and his advocates have become so practical and sincere in their demands for Reform that they will accept "participation" without "predominance," the "settlement of the question" will have been attained, but not till then. A large majority of the people of England are indignant that Mr. Bright should have, or appear to have, dictated to the late Government; they desire some measure which, leaving the franchise in the hands of the middle classes, should so distribute the electoral privilege as to bring the House of Commons more than it is into union with the feelings of the people. They do not choose to see all other classes of voters "swamped" by the lowest. Lord Russell rightly insists that "the aim of all Reform should be to make Parliament the mirror of the nation," and any further enfranchisement of the working classes, or of any class, is desirable only as a means to this end. The managers at Reform committees and demonstrations frankly avow their ultimate object to be universal suffrage, vote by ballot, and equal electoral districts, although it is perfectly plain that if these objects were realized representative government would entirely disappear. It has been well observed that the decisions that are taken within the next two or three years will determine, in all probability, the future character and complexion of our constitution. The public apathy upon questions of domestic policy is profound. The nation is too intent on other matters to point out to its rulers the course it would have them to take; its destiny is in the hands of a score or so of influential politicians of various schools. If they understand the supreme importance of the crisis to forget awhile, for their country's sake, old antipathies or personal aspirations, the men who really love our ancient constitution will be gathered under one banner, and their united force will defy democracy. But if the opportunity is squandered in personal self-assertion or sectional bickerings, they must pale before an enemy who, at least, may claim the praise of never suffering private ambition to impede the attainment of a great end.

Trouble with Spain.
The telegraph announces the departure of a fleet of war vessels, followed by an ironclad, for Cadiz, Spain, to demand satisfaction for the seizure and confiscation of the British steamship Victoria by the Spanish Government. The Victoria was seized by Spain on a charge of being a Chilean privateer fitted out in England to prey upon Spanish commerce after the fashion of the Confederate steamer Alabama upon American vessels. It was proven to the satisfaction of our Government that the Victoria was a peaceable merchant vessel, engaged in a legitimate trade, when seized. A fate similar to that which happened the Victoria befel the steamer Tornado, seized about four months ago by Spain on a like pretext. In the case of the last named vessel, the officers and crew were imprisoned and submitted to great indignities. Spain has treated with contempt all our demands for redress, and "patience having at last ceased to be a virtue," a fleet of British vessels have gone down to enforce the claim of our Government at the cannon's mouth.

Serenade.—Lieut. Hansell, of the U. S. Revenue Service, and Mrs. Hansell, (a newly married couple) were serenaded at the St. George, last night, by a number of congratulating friends. The bridegroom acknowledged the compliment in a graceful manner.

MR. DALY takes pleasure in announcing to the inhabitants of Victoria and its vicinity that the alterations in his photographic gallery are now completed, and that those who favor him with a visit may depend upon getting a faithful portrait. Views of houses or scenery photographed in an artistic manner, Fort street, near Government.

VICTORIA RIFLE CORPS.—Musketry instruction: Tuesday and Thursday at 8 p. m., James Bay. Position Drill: Tuesday and Thursday at 7.30, James Bay. See Order Book. By order, J. Gordon Vintner, Lieut. and Adj.

AYER'S CHERRY PECTORAL surpasses all other remedies in the rapid and radical cure of Coughs, Colds and Consumption.

By Electric Telegraph
SPECIAL TO THE DAILY BRITISH COLONIST
LAST NIGHT'S DESPATCHES.
Eastern States.
Chicago, April 13.—The Russian Treaty was telegraphed to the Czar of Russia yesterday at a cost of \$9,500. It is understood that a formal assent has already been received.

Mexico.
New York, April 12.—The Mora Isle brings Havana dates to the 5th. The Liberals are besieging Vera Cruz. It is supposed that it cannot long hold out. The Imperialists are quarrelling. Juarez has resigned; Taboga has command. The seige closely maintained. Water has been cut off, and the last bullock in the city has been killed. The Havana Diario reports that Maximilian is at Cuavala, but does not state how he got there.

An extra of the Star and Herald, dated April 1st, contains news of a revolution in Bogota. It says by this conveyance we have very important news from Bogota, which has reached us by telegraph, and of which we expect full particulars by the regular mail. A revolution has broken out in Bogota, headed by Mosquera. The Congress has in consequence been dissolved.

Europe.
New York, April 12.—European advices to March 29th say that Prussia is closely allied with the Russian champions of the Christians of Turkey. Austria joined Russia, expecting indemnification for loss of territory by dismemberment of Turkey. France has recently gone over to Russia, and is courting her friendship on the German question. All unite to recommend the Port to cede Crete to England by official declaration. The Earl of Derby declines to join, but will not oppose cessation.

London, April 12.—The Princess of Wales is reported to be at the point of death. A surgical operation is necessary, but she cannot endure the pain, and is too weak to take chloroform. The news has been carefully kept from the public.

London April 12.—Evening.—The Grand Jury in the case of Governor Eyre has brought in an indictment. The Canadian railroad bill has been introduced in the House of Lords. The fleet which sailed from Cadiz early this week took out a peremptory demand from the British Government upon Spain for instant redress for the seizure of the steamer Victoria. The Spanish Government made an evasive reply to the summons. In regard to the steamer Tornado, Spain made no answer whatever.

Liverpool, April 12.—Evening.—An iron clad steamer has gone to sea, supposed to be bound for Cadiz to support the claims against Spain.

Berlin, April 11.—Count Bismarck sent an energetic note to Paris, demanding Emperor Napoleon's reasons for arming. He says Prussia holds France responsible for the consequences of such a step, and asks for the instant cessation of warlike preparations.

Dublin, April 11.—London, otherwise called Gen. Massey the leader of the Fenian insurrection has turned informer and will not be indicted.

Steamers for Victoria.
San Francisco, April 17.—The steamer Sparrowhawk will sail this evening and the California to-morrow for Victoria.

Cariboo Mining News.
[DATES TO MARCH 30.]
(From the Cariboo Sentinel.)
WILLIAMS CREEK.
The mining season of 1868 gives the fairest promise of being not only the earliest opened but also the most interesting and prosperous that has yet been experienced in Cariboo. The buoyant spirits, exuberant hopes, and general good health enjoyed by the miners, together with the great amount of preparatory work done during the winter months, point distinctly to general prosperity and success while the immediate prospect of not a few are such as to warrant them in expecting immense wealth even before the end of this season.

The past winter, to which we now bid 'good night,' has been more uniformly cold than any of the previous ones, but not so severe; and its pleasures, enjoyments and associations have been so far in advance of those of other winters, that even those miners whom fortune may have doomed to failure this year can be happy in their misfortune to have to spend another winter in the mines. May their number be but few.

Although all the companies above Richfield paid very well during the whole of last summer it required this winter to prove their real value. With but one or two exceptions these claims have paid over expenses throughout the winter, and their value has been enhanced by the discovery of another and richer stratum of pay dirt further in the hill.

The companies that have paid for working this winter are the Bradley-Nicholson, China, Taylor, Brouse, Wells May Ann, Dutch Hill, Six-toed Pete and Cal Ket Companies. The Hydraulic Companies between Richfield and the canyon are prospecting in the hill for a back channel. The Badrock Drain is progressing rapidly. The Bald Head company expect the drain to reach their lower shaft in about two weeks. Wake up Jake company are working under ground with rockers. Cariboo company are working on the Drain. Hit or Miss company paying well. Borealis company are running a new tunnel. Davis company are drifting from their old shaft. Never Sweat company are paying expenses. Caledonia company are paying over wages. Cameron company paying over wages. Rankin company paying over expenses. Rankin company have struck a good prospect in an upper stratum.

STOUTS OUT.
High Low Jack company in running a side drift struck a second channel with good prospects. Floyd company, working eight men all winter, have run a tunnel and raised

a shaft, and expect to work from both; they are now securing their ground against the expected spring freshet. Alturas company are running a tunnel, working 12 men; they took \$440 out of the dirt from two small sets of timbers, and are now sinking a shaft to the main tunnel. Jenkin's company, nine men, worked all winter; in running a side drift they found a prospect of \$17 to the pan.

GROOSE CREEK.
The Heron company paid \$800 dividend to the interest last week. The Black Hawk ground is drained by the up-stream drift of the Heron company; the company have begun to work and expect to be taking out pay in a short time. The Full Rigg company paid \$200 dividend to the interest last week. The Discovery, Cascade and Rankin companies are washing.

The creek was the scene of considerable excitement during last week. The Hard up company, immediately adjoining the lower line of the Heron company, were supposed to have found deep ground in their tunnel. But alas! the Heron channel was not there. They struck rock at 15 feet and drifted a short distance, sufficient to satisfy them that there was no channel there. The course which the lead takes in the Hard-up ground is now, after eight months' prospecting, as great a mystery as ever. It is probable the Heron company may work the lead out from side to side of their ground before it is found by the adjoining companies on either side of them. It is very likely now that the lead will first be traced on the upper side of the Heron company, as intelligence has been received that it is the intention of the Government to cancel the charter of the Grange Creek Flume Company after the 31st May next, unless the amount of work required by the charter be performed before that date. This is likely to give a fresh impetus to prospecting on that creek as many claims have delayed working on account of the tenure of the Flume Co.

The Heron company still continues to pay large dividends. The Discovery and Full Rigg companies are also paying very well. The Caledonia is prospecting for the Heron lead.

CONKLINS GULCH.
Ericson company are running an incline and tunnel into their ground from Williams creek, the tunnel is in about 100 feet. Unit ed company are running a new tunnel which is in 250 feet. A company is formed to prospect the bank on the opposite side to the United claim. The Home Ticket company have struck some fine prospects. The Home Stake company have struck the rim rock with their new tunnel. The Home company have not yet reached the rim rock with their tunnel which is progressing very rapidly. The Plute have sunk a shaft on their ground. Other companies are preparing to prospect. The gulch is stacked off from its mouth to its source.

CANADIAN CREEK.
The Miller company have been driven out of their shaft with water, and are busily engaged in erecting machinery which they expect to have nearly finished in two weeks. The company prospecting the right bank at the mouth of the creek have lost the gravel and intend sinking a new shaft further in the hill.

LOWHIE CREEK.
First Chance Tunnel company are making over expenses. Boyle Company are making over expenses. The amount of water on creek prevents the other companies from working to advantage before the snow melts.

LIGHTNING CREEK.
There are three companies prospecting on this creek. Byth company which paid so well last summer are preparing to take out pay.

BURNS CREEK.
Burns company have worked all winter opening up their claim, and are now waiting for an increase of water with which to begin washing.

DAVIS CREEK.
Some good diggings have been struck in the hills on this creek during the winter.

SEAR CREEK.
Mr. O'Hara and others have located discovery claims on this creek. The rich spots found in 1863 were favorable indications of a lead, but hitherto prospectors have been unable to find it.

KEITHLEY'S CREEK.
The Anglo American Hydraulic company have purchased the claim, and are now waiting for an increase of water with which to begin operations as soon as the season is sufficiently advanced.

DEGUS GULCH.
Several claims have been located on this gulch during the last two weeks. Some of the companies will begin prospecting immediately.

ANTLER CREEK.
There is but one company prospecting on this creek; they are running a tunnel into the hill.

CANTON CREEK.
The Stewart Quartz company have quit working. The Washburn company sank a shaft 62 feet deep on their ledge, and found at that depth some of the richest quartz that has ever been seen in the district. The most of the shareholders and workmen are in here at present. The company held a meeting on Monday last, at which it was agreed to erect two arastras on the ledge.

MISCELLANEOUS ITEMS.
\$300 were raised on Williams Creek for Perkin, the blind collier, by Mr. Dakin.

The buildings belonging to the estate of Oppenheimer & Co., Barkerville, are offered for sale.

From 1st January, 1866, to 31st December 44 patients have been admitted to the William Creek Hospital, and 155 have received advice and medicine as out-patients, consisting of surgical and medical cases. The number in the hospital on 1st January, 1867, was 8; 5 were admitted since 1st February, and 27 have received relief as out-patients.

The roads throughout the district are in good order.

Minard Hilton was arrested on complaint of George Murdoch, who charged him with wilful and corrupt perjury in swearing to certain stakes of the Watson company. After an examination before Mr. Spalding, he was discharged without a stain on his character.

At Queneamouth, a party sinking a well for the Ocedon mill, fell in front of the house, about 200 feet from the house, 8 feet deep, and was killed. The body was recovered at the depth of 45 feet a stratum of two feet pay dirt averaging \$1 to the pan. The whole flat is stacked off. Another party is said to have struck a good prospect on one of the benches in the vicinity of the town.

The news from Canyon Creek is still very flattering. Six sleighs had arrived from Soda Creek loaded with flour and grain; they were four days making the trip on account of the number of snowdrifts.

The number of marten skins taken during the winter was 1200, worth \$4200.

CARIBOO RETAIL MARKETS.
Bacon, 87½c per lb.; Butter, \$1 50 do; Tea—U. S., \$1 25 lb. B. Co. \$1 75; Sugar (S. L.), 50c; Sugar, Crushed, 62½c; Coffee (green), 75c; Coffee (ground), \$1 25; Candles (English), \$1 25; do American, \$1; Tobacco from \$2 to \$3 per lb.; Flour, \$25 per 100 lbs; Cheese, \$1 per lb.; Brandy, \$1 per gallon; Whiskey, \$9 do; Sherry, \$9 do; Port, \$9 do; Champagne, from \$60 to \$75 per basket; Shovels, \$4 each; Yeast Powder, 62½c per box; Nails, 50c per lb.; Beans, 55c do; Beef, from 25c to 30c do; Mutton, 25c to 40c; Milk, 3½c per gallon; Hay, 12½c to 15c per lb.

Municipal Notice.
The Council met last evening. The Mayor and four Councillors were present.
Further time was granted the committee appointed to report in relation to the offer of J. P. Davies' Fort street premises as a city market.

MR. TITUS' CLAIMS.
The Council having on several occasions discussed this matter and taken evidence on the same resolved itself into committee of the whole, Mr. Titus in the chair, and unanimously agreed on the following, moved by Mr. Gibbs: That this Council having carefully deliberated upon the claim of M. M. Titus for the construction of the View street drain, and after having reviewed the action of the preceding Municipal Council upon the same, have come to the unanimous conclusion that they would not be justified in entertaining or otherwise acknowledging such claim.

The clerk was instructed to notify Mr. Titus accordingly.

The Council rose, reported progress and took up the communication of Jeffray, Bray & Reynolds, and came to the decision not to interfere with the recommendation of the Finance Committee of last meeting, viz: to pay 25 per cent. on claims, balance to be paid quarterly.

Council adjourned until Tuesday evening next at half past seven.

Bankruptcy Court.
[Before Chief Justice Neidham.]
Wednesday, 11th April, 1867.
Re Harris—Application of the Official Assignee in the matter of Murray's bill of sale. Judge ordered the issue to be tried by jury on the 2nd of May, to be heard with counsel on both sides. The summons was dismissed.

Re Eeans—Upon application of counsel (Mr. Ring) a traders debtors summons was ordered to be heard in chambers. For the bankrupt Mr. Ring and Mr. Robertson were instructed by Mr. Peakes; for the opposing creditor (Casamayo) Messrs Drake & Jackson appeared.

Re steamer Fly—\$56 10 ordered to be paid the Marshal of the Court for fees attendant upon the sale of this vessel.

Re Fry—Bankrupt ordered to be discharged from his debts.

Unclaimed dividends in the estates of Wm. Crockett, W. J. Carr, A. Blackman, F. Peter and Moore & Gaskie, were ordered to be paid into the Treasury.

The ENTERPRISE arrived at 6 o'clock last evening with a few passengers and a Cariboo Express. As freight, she had on board 100 cords of wood for the use of the steamer Alexandra, detailed for the Surveying Service.

MAGUIRE'S BRASS BAND discoursed delightful music from the verandah of the Alhambra building last evening, to the manifest delight of a large number of listeners.

CRICKET.—A cricket match will be played on Easter Monday between eleven of the best and eleven Victorians. Wickets will be pitched at 10 a. m., on Beacon Hill.

A HINT FOR SHERIFF ELLIOTT.—Why should an organist pay a hawker's license? Because he pedals (peddles) out his music.

The Sparrowhawk arrived at San Francisco on Tuesday and left last evening on her return.

HOLLOWAY'S PILLS—Famous Existence.—This medicine endures every attribute required in a general and domestic remedy; it cures the foundations of disease laid by defective food and impure air. In obstructions of the liver, lungs, bowels, or any other organs, these Pills are especially serviceable and eminently successful. They should be kept in readiness in every family, as they are a medicine without a fault for young persons, and those of feeble constitutions. They never cause pain, or irritate the most sensitive nerves or most tender bowels. Holloway's Pills are the best known purifiers of the blood, and the best promoter of absorption and secretion, which remove all poisons and obnoxious particles from both solids and fluids.

A. T. ELLIOTT.....City Auction Rooms.....will sell, at 12 o'clock noon, at Salesroom, Household Furniture; also Books; also Electrical Machine &c.

THE NORTHWEST COAST SURVEY.—We yesterday visited the H. B. Co.'s stern-wheel steamer Alexandra, which has been thoroughly overhauled and strengthened for the use of Her Majesty's officers, who, under the command of Capt. Pender, are charged with the duty of completing the survey of the Northwest Coast of the Colony. The bands were engaged in putting aboard 125 cords of wood for the use of the steamer, which, with 80 tons of coal, it is expected, will last for two months. A new promenade deck has been laid on the steamer, and the great stern-wheel shortened by eighteen inches; a neat forecabin has been fitted up for the men. The officers will occupy the cabins of the steamer, which have not been altered. The engines of the boat have received the attention of Mr. Elliott, a Company's engineer, who will go north with the Alexandra—the engineer of the Beaver, Mr. Bondwick, remaining, to receive and place in position two boilers for that steamer, which are expected daily by the Princess Royal, from England. The Alexandra will steam round to Esquimalt to day, and will depart for the north as soon as possible after the arrival of the Sparrowhawk from San Francisco.

THE REVENUE OF CARIBOO.—The total revenue of this district for 1865 was \$33,872 38; for 1866, \$34,745 37, showing a balance of \$872 99 in favor of last year. It is to the several items however that we look for the signs of slow but sure progress. There is a balance in favor of last year from all the general sources of revenue except spirit licenses and mining receipts general. There is a balance of \$827 in favor of 1866 for Free Miners certificates, and a balance of \$715 80 in favor of the same year for Postage, in fact, the Postage receipts have nearly doubled in one year. The receipts for 1865 were \$931 70; for 1866, \$1,647 50. Fines, forfeitures and fees of Court show a balance in favor of 1866, and Trade Licenses a balance of \$901 28 in favor of the same year. From these figures it appears that there has been less spirituous liquors sold in 1866; that there has been a greater number of Mining and Trading Licenses issued in 1866 than in 1865, and nearly twice as many letters and papers received; and, sad to relate, there has been more law. With the exception of this last item the balances all show progress.—*Cariboo Sentinel.*

GROUSE CREEK FLUME.—A grant has been given to the Flume Company, consisting of 1250 feet, beginning at a point 500 feet from the head of their flume, running up stream, on conditions that they will relinquish their former claims, work continuously on their present ground and complete the remaining 750 feet of flume before the end of the season 1866. A proclamation was issued by the Gold Commissioner on the 23rd inst., declaring all that part of Grouse Creek which was held by the Flume Company, four and a half miles in length, to be open for pre-emption, reserving of course the 1250 feet for the company. This is a valuable gift, prospecting above and below, and on both sides by industrious miners, and the conditions of tenure are very easy. Under the old charter, the Flume Company had 1500 feet of flume to construct each year, when they knew nothing of the value of the ground; under the new charter the company have only 750 feet of flume to construct in two years; one-half the amount in twice the time, when they know the ground is rich.

A BAD PRECEDENT.—The News says that the Inspector of Weights and Measures has been allowed to "nominate a successor" during his absence at Cariboo as overseer for a mining company. We shall next hear of the Stipendiary Magistrate, or the High Sheriff, or the Superintendent of Police, accepting a position in some other part of the Colony and "nominating a substitute" during his absence. The system is a highly improper one; and it does to "compensate" Mr. Sparrow for the loss sustained by him in being removed from the Post Office because the Colony was too poor to pay him, is still more improper. According to this argument, every business man who risked his all in the Colony and lost it, is entitled to "compensation," just as much, if not more, than Mr. Sparrow, who held a situation for several years under the Island Government.

CORONER'S INQUEST.—Mr. Pemberton, acting as coroner, yesterday held an inquest over the body of John Primer, late stoker of H. M. S. Malacca, who was drowned in Esquimalt harbor, about seven weeks ago, by the upsetting of a boat. The evidence went to show that deceased and three others got into a boat at the Esquimalt landing late at night; that the boat contained some water which they neglected to bale out; that when some distance from the wharf, deceased refused to pull the oars; that as Riley, one of the survivors, was stepping from the stern to take the oars, the boat careened; and that the occupants were thrown out and Primer and one other drowned. The jury returned a verdict of accidental drowning.

GOVERNMENTAL TRIP.—Governor Seymour has chartered the Fraser River steamer Onward to carry a number of invited guests from Westminster to Yale, on Tuesday next. From the Island, Chief Justice Needham and family, Hon. W. A. G. Young and family, and a number of others will participate. The Governor and Mrs. Seymour will take the stage at Yale and go as far as Boston Bar. The party expect to leave New Westminster on Tuesday next, and to return on the following Saturday.

HO! FOR SITKA.—The Sitka fever has commenced to rage in this locality, and, no doubt exists in quite a virulent form at San Francisco. Already visions of a great metropolis in the Polar regions and dreams of sudden wealth by a rise in town lots begin to form the day dreams of speculative citizens, and anxious inquiries are made as to when, a steamer, by means of which they may visit the locality and prospect for "rich strikes," will start. The owners of the New World have been approached with an offer for the trip, express themselves in favor of accepting it should a sufficient number of passengers offer.

NEW WESTMINSTER ITEMS.—From the *Columbian and Examiner* we glean the following items:—A dairy has been started at Sumass....Chinamen have gone up the river for Kootenay....The filling of a cistern with water was made the occasion of a grand torch-light procession by the firemen....There are eighteen prisoners in jail at the Capital.

"TAKE NOTICE."—That the writer in the *Morning News* who accuses the proprietors of the *Colonist* of suppressing a telegram intended for that office, is guilty of a deliberate, willful and malicious misstatement, which he knew to be false when he penned it. No telegram intended for our cotemporary has been suppressed in this office.

CATALOGUE SALE OF FURNITURE.—The most extensive furniture sale that has yet taken place on the Island will be held at the St. Nicholas Hotel, on Wednesday next. The furniture is contained in fifty rooms of the hotel, and comprises about 1000 lots. Catalogues will be ready on Saturday.

SAILED.—The bark Lono and Scotland sailed from Esquimalt harbor yesterday morning. The Lono is laden with lumber, and is bound for Honolulu, S. I. The Scotland goes to San Francisco with a cargo of Nainaimo coal.

A. D. RICHARDSON, correspondent of the *New York Tribune*, who was here in 1865 with the Colfax party, was recently shot in that city by an enraged husband, with whose wife he was walking. The wound is not dangerous.

FROM NAINAIMO.—The U. S. mail steamer New World returned from Nainaimo yesterday morning. She has on board 150 tons of coal for her own use. The bark Glaramara, for San Francisco, and the steamer Alexander III, for Sitka, are loading with coal.

The California will leave San Francisco for Victoria to-day.

Is instructed to sell

BY AUCTION

THIS DAY,

Thursday, April 18,

AT 11 O'CLOCK, A. M.

AT SALESROOM,

Wharf Street,

A Choice Collection of

BOOKS,

Comprising:

Parliamentary Debates, Hansard's in 56 Volumes, commencing in 1803.

Transactions of the London Society of Arts, with Engravings, 37 vols.

Statutes of England.

Vancouver's Voyages.

Imperial Gazetteer and other rare Legal and Miscellaneous Works, forming part of a Private Library.

ALSO,

Superior full-set of Bedroom Furniture, with Marble-tops, and Brussels, Carpet.

Extension Dining Table.

ALSO

A number of Curious Indian Masks, Spoons, Bowls, Figures, and other articles of Indian vertu.

Over a Million Dollars Saved.

GENTLEMEN:—I had a negro man, worth \$1,200 who took cold from a bad hurt in the leg, and was useless for over a year. I had used everything I could hear of without benefit, until I tried the Mexican Mustang Liniment. It soon effected a permanent cure.

Montgomery, Ala. June 17th, 1895.

"I take pleasure in recommending the Mexican Mustang Liniment as a valuable and indispensable article for Sprains, Sores, Scalds, or Galls on Horses. Our men have used it for Burns, Bruises, Sores, Rheumatism, &c., and all say it acts like magic."

Foreman for American, Wells Fargo and Harnden's Express.

The sprain of my daughter's ankle, occasioned while skating last winter, was entirely cured in one week, after she commenced to use your celebrated Mustang Liniment."

Gloucester, Mass. August 1, 1895.

It is an admitted fact that the Mexican Mustang Liniment performs more cures in a shorter time, on man and beast, than any article ever discovered. Families, lawyers and planters should always have it on hand. Quick and sure it certainly is. All genuine is wrapped in steel-plated engravings, bearing the signature of G. W. Westbrook, Chemist, and the private U. S. stamp of Dennis Barnes & Co. over the top.

As aforesaid has been made to counterfeit it with a cheap stone plate label. Look closely!

Lyon's Kathairon.

It is a most delightful Hair Dressing. It eradicates scurf and dandruff. It keeps the head cool and clean. It makes the hair rich, soft and glossy. It prevents hair turning gray and falling out. It restores hair upon prematurely bald heads.

This is just what Lyon's Kathairon will do. It is pretty—it is cheap—durable. It is literally sold by the ear-load, and yet its almost incredible demand is daily increasing, until there is hardly a country store that does not keep it, or a family that does not use it.

Lyon's Flea Powder

Lyon's Magneite Insect Powder is instant death to Flies, Ticks, Boches, and everything of the insect species. It is one of the few articles that can be relied upon, and for a mere two bits we can save the bites and annoyances of these little pests. None is genuine unless signed by E. Lyon, and bearing the private stamp of Dennis Barnes & Co., New York.

Lyon's Extract Ginger.

LYON'S EXTRACT OF PURE JAMAICA GINGER—for Indigestion, Nausea, Heartburn, Sick Headache, Cholera Morbi, Flatulency, &c., where a warm stimulant is required. Its careful preparation and entire purity make it a cheap and reliable article for culinary purposes. Sold everywhere, at 50 cts. per bottle. Ask for "Lyon's Pure Extract." Taken into other.

Caution.—See that the private U. S. Stamp of Dennis Barnes & Co., is over the cork of each bottle; none other is genuine.

Plantation Bitters,

MAGNOLIA WATER,

AND ALL ABOVE ARTICLES,

San Francisco Assaying

REFINING WORKS,

No. 416 Montgomery Street,

(Successors to Kellogg, Hewston & Co.)

CAPITAL STOCK, \$1,000,000.

Directors:

JOHN PARROTT, CHAS. E. McLANE, WM. C. KALSTON, A. HAYWARD, LOUIS A. GARNETT.

THIS COMPANY HAVING GREATLY ENLARGED

its facilities for refining, and introduced many other important improvements, are pleased to announce that they feel warranted in again reducing materially their terms of doing business.

The Tariff of Charges

Which they now submit to the public—considered with reference to the cost of material and labor—is lower than in any other part of the world, and secures to the mining interest of this coast an important increase in both the mining and commercial value of bullion.

Their charges hereafter will be as follows:

For Assaying Deposits for Unparted Gold Bars.

One-eighth of one per cent. (hereafter a quarter) for all amounts over \$1,000, and two dollars for any smaller sum. Returns made in twenty-four hours.

For Assaying Deposits for Unparted Silver Bars.

Two dollars for the gold contained, up to \$1,000, and one-eighth of one per cent. for all amounts over that sum, and one per cent. on the silver contained. Returns made in twenty-four hours.

For Refining Deposits made for Gold or Silver Bars.

On bullion under 300 parts gold, 2 cents per ounce. On bullion from 300 to 600 parts gold, 4 cents per ounce. On bullion from 600 to 900 parts gold, 6 cents per ounce. On bullion from 900 to 1200 parts gold, 8 cents per ounce.

On bullion from 1200 to 1500 parts gold, 10 cents per ounce. On bullion from 1500 to 1800 parts gold, 12 cents per ounce. On bullion from 1800 to 2100 parts gold, 14 cents per ounce. On bullion from 2100 to 2400 parts gold, 16 cents per ounce. On bullion from 2400 to 2700 parts gold, 18 cents per ounce. On bullion from 2700 to 3000 parts gold, 20 cents per ounce.

The charge for refining is one-half of one per cent, and the charge for making fine silver bars, the same. Comparing the net value of deposits for refining, with the proceeds of unrefined gold bars sold in the market—assuming that the bars have cost 1/2 of one per cent—they must be sold at the following par rates to equal the returns which would have been made had they been deposited for refining:

Sproat & Co

OFFER FOR SALE

THE UNDERMENTIONED

Medical.
Scrofula, or King's Evil.
A constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously conveyed by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending from parents to children, and is, in fact, a fourth generation; indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."
Its effects commence by deposition from the blood of corrupt or noxious matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which renders the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the scrofulous action which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.
One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alternative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in
AYER'S Compound Extract of Sarsaparilla,
the most effective remedy which the medical skill of our times can devise for this every-where spreading and fatal malady. It is combined from the most active remedies that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eruptions and Skin Diseases, ST. ANTHONY'S FIRE, ROSE, or ERY- SIPHELA, PIMPLES, PESTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, ITCHINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPERSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in the "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,
FOR ALL THE PURPOSES OF A FAMILY PHYSIC, are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitality. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.
Not only do they cure the every-day complaints of every body, but also the more formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Action of the Bowels, Flatulency, Loss of Appetite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,
FOR THE RAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.
So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of our globe abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superior efficacy over every other kind of medicine is apparent to observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

Holloway's Ointment.
This wonderful Ointment acts like magic in relieving and curing old sores, wounds, bad legs, ulcers and eruptions of the skin; when rubbed on the surface it penetrates and purifies each pore on its passage, and cures the skin, while the internal system is purified by the blood. It is a certain cure for all the following complaints: Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Action of the Bowels, Flatulency, Loss of Appetite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Medical.
FRENCH MEDICINES IN VOGUE.
BY GRIMAULT & CO.,
Chemist to H. I. H. Prince Napoleon,
49 RUE RICHELIEU, PARIS.
NO MORE COD LIVER OIL
GRIMAULT'S SYRUP OF IODIZED HORSI RADISH.
This syrup is employed with the greatest success, in place of cod liver oil, to which it is infinitely superior in curing diseases of the chest, scrofulous lymphatic disorders, green sickness, muscular atrophy, loss of appetite. It regenerates the constitution by purifying the blood, and is, in a word, the most powerful and known. It never fatigues the stomach and bowels, and administered with the greatest efficacy to young children, engenders to humors or obstruction of the glands. At last, it is very efficacious in the treatment of the skin.
NO MORE CONSUMPTION.
GRIMAULT'S SYRUP OF HYPOPHOSPHATE OF LIME.
This most salutary is a sovereign remedy in phthisis at all stages of the lungs, promptly removes all the most serious symptoms. The cough is relieved; the night sweats cease, and the patient rapidly recovers in health.
NO MORE POVERTY OF THE BLOOD AND PALE COMPLEXION.
DRS. LERA'S PHOSPHATE OF IRON.
This new ferruginous medicine contains the elements of the blood and bones, and iron in a liquid state. It is different from all other iron for the blood, as it is not only absorbed, but it is also assimilated, and it is found in the stomach, without any of the usual effects of iron, and can be borne by the most delicate stomachs.
Better than Cod Liver Oil.
GRIMAULT'S CAPSULES AND LIQUID EXTRACT OF MARIU VEGETALIS.
Where all other preparations have failed, these capsules will always effect a cure. These capsules are rapid and extraordinary cures of severe rheumatism and chronic cases of privy diseases. They are used in the hospital of Paris, by the use of cod liver oil, and are found to be greatly superior to all other known remedies, and are used in the treatment of the most delicate cases of consumption and cancer. The capsules are used in recent and chronic cases of consumption and cancer. The capsules are used in recent and chronic cases of consumption and cancer.
DIGESTIVE LOZENGES AND POWERS OF ALKALINE LACTATES.
BY J. BURIN DU BUISSON,
LABORATEUR DE LA PARIS IMPERIAL ACADEMY OF MEDICINE.
This delicious preparation is prescribed by the most reputed doctors in France, against all derangements of the digestive functions, such as gastritis, indigestion, long and painful digestion, wind in the stomach and bowels, constipation, jaundice, and complaints of the liver and bile.
General Depot in Paris.

CURES AND COMFORT FOR THE BED-RIDDEN.
—BY—
Holloway's Ointment.
This wonderful Ointment acts like magic in relieving and curing old sores, wounds, bad legs, ulcers and eruptions of the skin; when rubbed on the surface it penetrates and purifies each pore on its passage, and cures the skin, while the internal system is purified by the blood. It is a certain cure for all the following complaints: Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Action of the Bowels, Flatulency, Loss of Appetite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

CHLORODYNE.
DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in Cholera, Dysentery, Diarrhoea, Colic, &c.
Dr. J. Collis Browne's Chlorodyne—Extract from the General Board of Health, London, as to its efficacy in Cholera—We are convinced that the value of this remedy, that we cannot too forcibly urge the necessity of adopting it at once. From A. M. K. G. Browne, Esq., late Inspector of Hospitals, Bombay—"Chlorodyne is a most valuable remedy in Cholera, Asiatic and Dysentery. To it I fully owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

Medical.
A Triumph of Science
AND
THE LIGHT OF THE WORLD
Dr Maggiel's PILLS AND SALVE.
These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these
Life-Giving Pills!
Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. The search out of the hidden system, to the patient suffering and reinvigorate the fading system. To shed and inform a few doses of these valuable PILLS will prove to be
A VERY FOUNTAIN OF YOUTH.
For in every case they add new life and vitality, and re- store the waning energies to their pristine state. To the young and middle-aged, they will prove most valuable, as a really, specific, and sterling medicine. There is a real, realized, that Ponce-de-Leon, sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to vigor and make youth over
An Eternal Spring
It was left for this day and hour to realize the dream and show in one glorious fact, the magic that made it fair.
These Famous Remedies
Cannot stay the flight of years, but they can force back, and hold aloft, diseases that might triumph over the young and the old. Let none hesitate to do so, but seize the favorable opportunity that offers. When taken as prescribed—
FOR BILIOUS DISORDERS
Nothing can be more productive of cure than these Pills. Their most magic influence is felt at once, and the usual concomitants of this most distressing disease are removed. These remedies are made from the purest
Vegetable Compounds.
They will not hurt the most delicate female, and can be given with good effect in protracted cases, to the youngest babe.
For Cutaneous Disorders
And all eruptions of the skin, the SALVE is most valuable. It does not heat or irritate, but penetrates to the most searching effects to the very root of the evil.
